

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

are the hartbeests and gnus (genera *Bubalis*, *Damaliscus* and *Connochætes*), all belonging to the subfamily Bubalidinæ, and residents of Africa and Arabia. Twelve colored plates have been issued, and seven are promised with the next number, which will be devoted to the duikers (*Cephalophus*).

C. H. M.

NOTES AND NEWS.

PROF. S. CALVIN, State Geologist of Iowa, announces that reprints of the photographs accumulated by the survey may be had for 12½ cents each. A descriptive list of views may be had on application to the State Geologist at Des Moines; all orders to be made by the numbers of this list. If this practice were generally adopted by our State Surveys, it would be greatly to the advantage of many students and teachers.

PROF. W. R. NEWBOLD, of the University of Pennsylvania, has become one of the associate editors of the *American Naturalist*. In the current number he gives an account of 'The Present State of Psychology.'

DR. WIRTINGER has been made Professor of Mathematics in the University of Innsbruck.

DR. WILDER D. BANCROFT, now Instructor in Harvard University, has been appointed Assistant Professor of Physical Chemistry in Cornell University.

PROF. FRANCIS GOTCH, now of University College, Liverpool, has been elected to the Waynflete Chair of Physiology at the University of Oxford, vacant by the transferrence of Prof. Burdon Saunderson to the Regius Professorship of Medicine.

JAMES E. OLIVER, Professor of Mathematics in Cornell University, died at Ithaca, on March 28th.

THE DUKE D'ORLÉANS has presented the Imperial Institute of London with his extensive collection of specimens of natural history, costumes and curiosities.

MR. LESTER F. WARD writes that he has just received from the family confirmation of the reported death of the Marquis Saporita. He died at Aix on January 25th.

DR. NIKOLA TESLA suffered a serious loss in the destruction of his laboratory by fire on March 13th.

GENERAL DE MASOUTY, Founder and Director of the Pic du Midi Observatory, died recently at the age of eighty years.

DR. HARRISON ALLEN has been elected a member of the Council of the Philadelphia Academy of Natural Sciences, to fill the vacancy caused by the death of John H. Redfield.

THE Joint Commission of the Scientific Societies of Washington has begun to publish a monthly programme, giving the dates of meeting of the various scientific societies of Washington for the ensuing month and a full list of papers to be presented.

AT a meeting of the New York Alumni of the Johns Hopkins University, on March 29th, President Gilman made an address on 'Impending Problems in Education.' An address was also made by Professor Butler, of Columbia College.

A NATIONAL Exhibition of Industry and Fine Arts in the City of Mexico will be opened on April 2d, and an International Exposition is proposed for Montreal, to be opened on May 4th.

AT the last meeting of the Academy of Natural Sciences at Philadelphia, Miss Emma Walter read a paper entitled *Does the Delaware Water Gap Consist of Two River Gorges?* She adduced evidence to show that the river once flowed through the Gap from the south towards the north; that this north-flowing river was pre-glacial, and that much the greater part of the erosion is the work of this old river, the remainder being due to the action of the present south-flowing stream.
